- Chinese - intermediate

Selling points

- Collaborative working experience with cross-functional teams, including designers, product managers, fellow developers, both in in-house and in remote positions.

- By working in multiple startups I have acquired a diverse skill set and accelerated my learning curve by having to adapt and take on unexpected responsibilities. I have completed many end to end projects starting from wireframe to deployment.

- Having lived and worked in 3 continents (Europe, US and Asia) have greatly increased and improved my communication skills, giving me confidence in both interacting and negotiating with people of all sorts of background and mindset.

- Developed essential non-technical skills in marketing, branding, and sales through personal entrepreneurial ventures, enriching my overall business sense and ability to contribute.

- Keeping up with all the new AI technologies and integrating them into my workflow so my productivity is enhanced.
